

Scale Control – Armored & Soft

Safari[®] Insecticide is a new generation, super-systemic neonicotinoid with quick uptake and knockdown of ferocious pests – including whitefly, mealybug, leafminer, fungus gnat and scale. *Safari* is especially effective against several species of armored scales – one of the most difficult to control pest groups on landscape ornamentals.

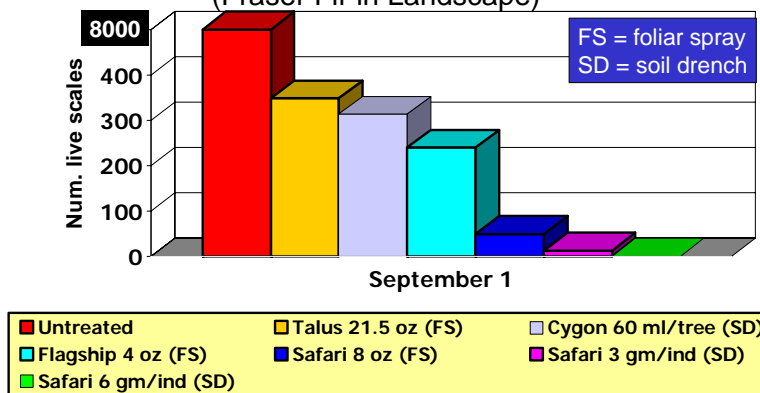

Safari offers:

- Super-systemic activity means rapid uptake and control following soil application
- Broad spectrum control
- Unsurpassed residual performance
- Favorable environmental profile
- Excellent rotation partner for Distance[®] Insect Growth Regulator

Insect	Application Method	Rate
Scale - Armored & Soft	Foliar	4 - 8 oz/100 gallons. Start treatment prior to buildup of high pest populations.
	Soil Drench or Injection	<u>Container:</u> 12 - 24 oz/100 gallons. Apply 4 fl oz of finished solution/6" pot. <u>Landscape:</u> Shrubs: 3 - 6 grams/foot of height or 1.0 - 2.1 oz/ foot of height. Trees: 3 - 12 grams/inch trunk diameter or 1.0 - 4.2 oz/ inch of trunk diameter. Note: 12 grams = 5 teaspoons.

Elongate Hemlock Scale
